

A Patient's Guide: Sharing My Record in MyCareCorner

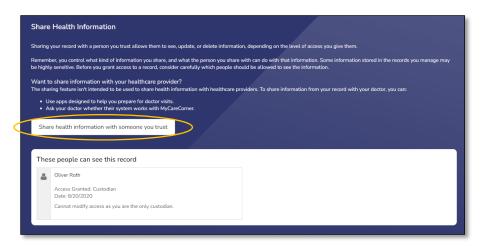

The **Share Record** option in MyCareCorner allows you to share your health record with other people, such as a spouse, parent, or children. Sharing your record allows them to view and update your health information, depending on the level of access you give them. Access can be changed or removed at any time.

Sharing Your Record

- 1. To share your health information, log into MyCareCorner.
- 2. On the home page, click the circle with your initials in it (upper-right corner of the screen) and select **Share Record**.

3. The Share Health Information screen is displayed. Click the **Share health information with someone you trust** button.

 Complete the information on the screen for the person you want to share your health information with. Enter the **Recipient's Email Address**, **Retype the Email Address**, and enter a **Passcode**.

The email recipient will need to enter the passcode to accept your invitation. To protect your invitation, don't email the passcode. Use another method to communicate this information to the recipient.

Sharing	Sharing your record with a person you trust allows them to see, update, or delete information, depending on the level of access you give them.						
Remember, you control what kind of information you share, and what the person you share with can do with that information. Some information stored in the records you manage may be highly sensitive. Before you grant access to a record, consider carefully which people should be allowed to see the information.							
	Want to share information with your healthcare provider? The sharing feature isn't intended to be used to share health information with healthcare providers. To share information from your record with your doctor, you car:						
Use apps designed to help you prepare for doctor visits. Ask your doctor whether their system works with MyCareCorner.							
	As you doub washed the system work with my account. Share health information with someone you trust
