

SORE LOSER

/noun/

A person who has healed from a chronic or hard-to-heal wound (sore).

Our specialized outpatient wound center is dedicated to the care of patients with chronic or hard-to-heal wounds. We want all our patients to heal their wounds and experience the joy they get when they become a “sore loser”!

We treat wounds of all types, including:

- Diabetic foot ulcers
- Venous ulcers
- Pressure injuries/ulcers
- Surgical wounds
- Traumatic wounds
- Arterial ulcers
- Radiation wounds
- Compromised skin grafts and flaps
- Crush injuries

Meet one of our “Sore Losers” who is celebrating their wound healing.

Norma's Story...

In May of 2023, a pickup truck came crashing into Norma's home. Debris flew all around, some of it hitting Norma directly, causing a slew of injuries. Norma was admitted to the hospital, where she received treatment and care for her injuries, and was discharged once she was stable and able to care for herself at home. Norma was released with a severe traumatic wound to her left leg that would require further care in an outpatient wound clinic setting. Norma followed up with her primary care physician, Dr. Steven Ebers, MD, who made a prompt referral for Norma to be evaluated and treated at the **WCMH Wound Clinic**. Norma received advanced wound treatments delivered by Sarah Rion, FNP-BC, WCC and the wound clinic staff and it wasn't long before the wound on Norma's leg was a thing of the past! After her wound was healed, Norma was able to get around with less difficulty and enjoy life again! When asked about her experience with Sarah and the WCMH Wound Clinic staff, Norma says they were amazing, and she cannot thank them enough for the personalized treatment and friendliness that they offered her. She credits them for healing her wound and helping her get her mobility back.
